

### Okoseal-N Type TC Cable (THHN/THWN-2)

UL Type TC and c(UL) Type CIC

600V Power and Control Tray Cable

Multiple Copper Conductors With or Without  
grounding Conductor 90°C Dry/90°C Wet

**For Cable Tray Installations - Sunlight Resistant - Direct Burial Rated**

- A Uncoated Copper Conductors
- B Okoseal Insulation
- C Clear Nylon Covering
- D Binder Tape/Rip Cord
- E Black Okoseal Jacket

#### Insulation

Okoseal® is Okonite's trade name for one of its PVC (polyvinyl chloride) insulating compounds with excellent electrical, mechanical and flame resistant properties.

#### Conductor Jacket

The nylon jacket over the insulation provides excellent mechanical strength and resistance to oil, gasoline and chemicals

#### Cable Jacket

The Okoseal (PVC) jacket is mechanically rugged and has excellent resistance to acids and most chemicals.

#### Applications

Okoseal-N Type TC tray cable is suitable for use in power, lighting, control, and signal circuits, indoors or outdoors. It may be installed in cable trays, raceways, or direct buried in the ground, and may also be supported in outdoor locations by a messenger wire. The cable is permitted for Class 1 circuits as specified in NEC Article 725 and for use in cable trays within Class I, Division 2 hazardous locations in industrial establishments, where maintenance and supervision ensure that only qualified persons service the installation. Not recommended for DC operation in wet locations.

#### Specifications

**Conductors:** Uncoated soft copper per ASTM B-3. Sizes smaller than #8 are compress stranded per ASTM B-8. Sizes #8 and larger are compact stranded per ASTM B-496.

**Insulation:** Okoseal insulation with clear nylon covering per UL 1581.

**Color Coding:** Base colors and tracers as shown on reverse of Data Sheet.

**Assembly:** Conductors are cabled together in accordance with UL 1277, with fillers as required and an overall binder tape.

**Grounding Conductor:** Where indicated, bare stranded copper in accordance with NEC Table 250.122.

**Overall Jacket:** Complies with UL 1277. The Okoseal compound meets or exceeds the requirements of UL 1581.

#### Product Feature

- **UL Listed Type TC (Tray Cable),** Sunlight Resistant, Direct Burial. Suitable for installation in cable tray, raceway, or direct burial, as permitted by the NEC. Rated THHN/THWN-2 conductors for use in wet or dry locations at 90°C.
- **UL 1277/IEEE Flame Tests:** Cable passes the Vertical Tray Flame Test requirements of IEEE 383 and UL1277; sizes 3/C #8 and larger also meet IEEE 1202 flame test requirements.
- **Temperature Ratings:** 90°C continuous in wet or dry locations; 130°C emergency overload; 250°C short circuit.
- **Construction Quality:** Manufactured under strict quality control to meet or exceed applicable industry standards.
- **Environmental Resistance:** Sunlight resistant; suitable for direct burial; resistant to moisture and many chemical atmospheres.
- **Performance:** High dielectric strength; thermal stability at elevated temperatures; mechanically rugged yet easy to install and terminate.
- **Design Advantages:** Small diameter and lightweight for easier handling and reduced installation cost.
- **Certifications:** CSA C22.2 No. 239 Type CIC for sizes 4/0 AWG and smaller; 1000V CSA Type CIC available for sizes 4/0 AWG and smaller.

Okonite's web site, [www.okonite.com](http://www.okonite.com) contains the most up to date information.

**Equipment Grounding Conductor:** Any conductor in these cables may be permanently reidentified during installation as the equipment grounding conductor in accordance with Section 250.119(B) of the NEC.

† **Cross-sectional** area for calculation of cable tray fill in accordance with Section 392.22 of the NEC.

### Ampacities (1)

Ampacities are based on Table 310.16 of the National Electrical Code for conductors rated 90°C dry or 75°C wet, in multiple conductor cable at an ambient temperature of 30°C (86°F).

The ampacities shown apply to open runs of cable, installation in any approved raceway, direct burial in the earth, or as aerial cable on a messenger. Derating for more than three current carrying conductors within a the cable is in accordance with NEC 310.15(C)(1).

The ampacities also apply to cables installed in cable tray in accordance with NEC 392.80.

\*Grounds may be split.

\*Current limited to 15, 20 and 30 amps per Section 240.4(D) of the NEC for #14, #12 and #10 AWG, respectively.
